

On Friday evening, February 2, 2024, we had the pleasure of presenting a number of new Moonwires products as part of the evening events organized by the l'Auditorium club in Vétroz. The latter takes advantage of the Stenheim auditorium, a Swiss manufacturer of high-end loudspeakers, for unique musical evenings.

Moonwires wasn't alone, as William Roussy from EMOSOUND in Sottens and Marc Gerber were on hand to present a DAC streamer they had developed themselves.

The new products distributed by Moonwires in Switzerland include LAN and USB cables, as well as a power cleaner manufactured by AB-TECH in Sweden.

AB-TECH's LAN and USB cables are designed to deliver optimized digital data transmission. Thanks to their advanced technology and galvanic isolation, these cables guarantee uncompromising data transfer quality, so you can make the most of high-end digital sources and leave room for your music.

The AB-TECH FRID power cleaner, which means "peace and tranquility" in Swedish, reduces electrical disturbances, thus improving sound quality, providing a better sound image, greater sonic finesse and more natural musical reproduction.

The evening began with an aperitif featuring a selection of Vaud wines donated by EMOSOUND.

Then we demonstrated the musical performance of the EMODAC DAC streamer, connected via our Moonwires Cetus mineral-shielded power cable, a pair of Columbia XLR cables, to a NEUKOMM integrated amplifier. The latter powered the new Stenheim Alumine 2.5 loudspeakers.

Marc Gerber was able to demonstrate the full musical performance of his streamer, with a selection of well-chosen tracks that revealed the full potential of their device.

Listeners were able to share their impressions, unanimous in their praise for the EMODAC's accurate and musical reproduction.

In the second part, we compared the performance of AB- TECH's LAN network cable with that of an already high-performance LAN cable, as well as the addition of the FRID power cleaner on the power strip.

The LAN and USB cables and AB-TECH power cleaner presented by Moonwires really impressed the audiophiles present at the event. Their cutting-edge technology and build quality were particularly appreciated, as was their ability to significantly improve the sound quality of high-end digital equipment.

The musical performance of the EMODAC DAC streamer was also widely praised, as was the quality of the Stenheim Alumine 2.5 loudspeakers.

High-fidelity enthusiasts enjoyed an evening rich in discoveries and exchanges.

The evening was a real success, allowing audiophiles present to discover the latest innovations in LAN and USB cables and AB-TECH's power cleaner.

The musical performance of the EMODAC DAC streamer from EMOSOUND was also highlighted, thanks to a judicious selection of tracks.

As for the Stenheim Alumine 2.5 loudspeakers, they fully conveyed the musical performance of the system presented during this beautiful evening.
